

Glasses, bottles & caps

Storage and Closure

Culture tubes and glasses

Culture bottles for the cultivation, transport and long-term storage

We offer a large variety of culture glasses and bottles with screw caps.

Our vessels are especially suitable for transport, despatch and long-term storage.

The glasses are delivered completely with screw cap made of aluminium respectively plastic including a rubber gasket.

Aluminium screw cap

- autoclavable
- sterilizable

Plastic screw cap

- steam-autoclavable at 121 °C
- sterilizable

Replacement screw caps available for

- Test tubes
- Culture tubes
- Culture bottles

Test tubes with screw cap

Made of borosilicate glass, strong-walled, 1.1 mm. The wide neck makes it easy to inoculate and clean.

Culture tubes with screw cap

Made of soda-lime glass, partly with frosted labeling space.

Storage cases for culture tubes

Two sizes of cases are available for storage and transport of culture tubes.

Storage case P
Made of polystyrene.
For 50 glasses 35 x 12 mm.

Storage case H
Made of wood.
For 100 glasses 50 x 14 mm.

Culture bottles, flat, octagonal

Culture bottles, round

Made of clear glass. DIN-standard.

Cultivation glasses

Ideal for the cultivation of cell cultures.

The roundrim glasses with straight sidewalls and loose lids are designed for growing and cultivating cultures.

The glasses stand firmly on the bottom even when empty and are stackable to save space.

The glasses are available with 250, 500 or 750 ml capacity. The covers can be fixed with clamps made of metal (optional).

Caps

Caps for sterile closing of vessels

Microbiological, bacteriological and biotechnical laboratories have various needs to seal test tubes or other glass or plastic vessels.

We offer a large range of caps in different sizes and styles.

Advantages of our caps

- stainless
- washable/reusable
- heat-resistant
- sterilizable
- tight sealing
- air circulation is warranted
- different colours for recognition

Recommendation for cleaning

The anodic oxidized coloured eloxal film of the aluminium caps is not resistant to alkaline detergents.

Therefore, we recommend the use of neutral cleaning supplies for cleaning, e.g. Extran MA02 neutral or P3 neutropon 5003, available on request.

Maximum temperature 140 °C.

Made of aluminium, anodized in colour, anodic oxidized. Springs made of chromium-nickel-steel.

CAP-O-TEST-caps

With clamp against the inner wall of the vessel.

LABOCAP-caps with handle

With clamp against the outer wall of the vessel.

LABOCAP-caps without handle

With clamp against the outer wall of the vessel.

ERLENMEYER-CAP-caps

With clamp against the outer wall of the vessel. Special caps for culture flasks and culture media bottles with straight neck of Ø 38 mm.

Made of pure aluminium, matt-finished, without spring.

ALU-STECK-caps

For placing loosely on top of vessels. Also suitable as open test vessels for a variety of other applications.

Ordering Information and Cat.-No.
